

PRAKASH ANGAPPAN

Engineering Manager | Game Development

Bangalore, India | +91-9900370190 | aprakash.mca@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Engineering leader with 17+ years of experience delivering 15+ games across console, PC and mobile. As Head of Engineering, I drive business success through predictable, on-time delivery while overseeing budgeting, technical strategy, resource planning, and cross-functional execution. I collaborate across Engineering, Design, Art, and QA to implement automation and AI-driven workflows that improve team productivity, reduce development friction, and optimize the entire game development lifecycle.

SKILLS

- **Business Operations:** Studio Budgeting, Resource Allocation, Scope & Contract Expansion, ROI-Driven Feature Development, Production Pipeline Automation.
- **People Leadership:** Team Building, 1:1s & Mentorship, Performance Evaluations, Career Progression Planning, OKRs, Coaching Across Experience Levels.
- **Live-Service & Delivery:** Live-Ops Support, Release Management, Incident Response & Production Triage, High-Cadence Pipeline Management, Risk Mitigation, Agile/Scrum.
- **Technical Domain:** Unity, Design & Code Reviews, Tech Backlog Modernization, Stability & Performance Tuning, Monetization & UI Shop Flows.
- **Cross-Functional Leadership:** Partnering with Product, Design, QA, Analytics, and Art; Scope & Priority Planning; Technical Tradeoff Discussions with Senior Engineers; Build/Release & Production Stability.

KEY ACHIEVEMENTS

- **Revenue & Scope Expansion (*Kiosk / Casino Mini Games*):** Transitioned a high-velocity live-service catalog (2 games/week) to the Godot Engine to eliminate licensing costs. Executed a 5-game test phase that resulted in a 100-title contract expansion.
- **On-Time Delivery & Billing Growth (*Hands of Victory*):** Maintained zero failed deliveries, meeting all milestones for a high-quality demo that secured a 3-month contract extension and additional studio billing.
- **AI Pipeline Efficiency (*BharatRun*):** Utilized generative AI tools to accelerate development, delivering the core demo 2 months early and securing full commercial game development contracts.
- **Team Scalability:** Created engineering career progression paths and led performance evaluations for graduate engineers, building a sustainable pipeline into core production roles to support studio growth.
- **Studio Prestige:** Directed technical delivery for *The Last Bastion*, winning Best Hardcore Game (AnimXpress 2022) and an Indie Game of the Year nomination (IGDC 2022).
- **Quality & Compliance:** Received the Best Performer Award at Gameshastra for optimization and performance work on *Desi Adda*.

TECHNICAL SKILLS

- **Engines & Frameworks:** Unity (primary), Unreal Engine, Godot, Phyre Engine, Vicious Cycle Engine, BlitzMax, Torque
- **Target Platforms:** Mobile (Android/iOS), Console (PS2, PS3 Move, PSP), PC, Web (HTML/Unity)
- **Tools & IDEs:** Visual Studio, Rider, Xcode, ProDG Debugger, Git, Perforce, Sourcetree, SVN, Jira, Trello

PROFESSIONAL EXPERIENCE

Head of Engineering - Gaming | iXie Gaming by Indium

Jan 2025 - Present (1 yr, 6 mos)

- Lead, coach, and manage performance for 10+ cross-functional engineers in a high-energy Agile/Scrum environment, owning 1:1s, feedback, and individual development plans.
- Conduct design and code reviews across *BharatRun* (Mobile Demo), *Hands of Victory* (PC Porting), and *Railflow* (Mobile); manage live-service pipelines end-to-end to ensure timely, stable releases.
- Modernized legacy tech stacks across the Kiosk catalog, optimizing studio bottom-line metrics while keeping delivery cadence intact.
- Partner with Product, Design, UI/UX, Art, and QA to plan priorities and scope, and support production issue triage and incident response to drive continuous improvement in stability.

Lead Programmer | VoidPeak Games

Dec 2020 - Dec 2024 (4 yrs, 1 mo)

- Led engineering for *Radiant Dark* (Action RPG, Unreal Engine); owned pipelines and directed core C++ architecture while guiding senior engineers on implementation tradeoffs.
- Fostered a problem-solving culture to clear advanced Gameplay Ability System (GAS) blockers, unblocking engineers without needing to be the primary implementer.
- Built foundational Enemy AI architecture and release pipelines for *The Last Bastion* (Strategy, Unity), and mentored engineers through code review and pairing to raise code quality.

Lead Game Developer | Tentworks Interactive

Jan 2019 - Nov 2020 (1 yr, 11 mos)

- Spearheaded architectural targets and set technical direction for a 4-dev squad on *City Block Builder* (PC, Unity); delivered high-performance worker AI optimization modules strictly on schedule.

Senior Game Developer | Learning Yogi

May 2018 - Oct 2018 (6 mos)

- Enhanced game stability and app performance for mobile titles *Catch the Pet* and *Pet Room* (Unity), reducing crash rates and improving load times to boost player retention.

Lead Game Developer | Aavega Interactive

Oct 2014 - Jan 2018 (3 yrs, 4 mos)

- Collaborated across disciplines to build and optimize multiplayer modes for *Jolly Rogers Pirates Rumble* (PC, Unity), delivering core systems and boss AI logic.
- Led a small team building monetization/e-commerce UI shop flows across live mobile games, guiding implementation and reviewing work for consistency to maximize revenue streams.

Game Programmer | Dhruva Interactive

Apr 2013 - Aug 2014 (1 yr, 5 mos)

- Resolved C# architectural defects during prototyping loops for an unannounced PC title, accelerating R&D phases.

Group Lead | Gameshastra Solutions

Apr 2007 - Sep 2012 (5 yrs, 6 mos)

- Managed engineers to execute release management, rhythm mechanics, and integrations for *Desi Adda* (PS2), directing day-to-day work assignments across concurrent titles.
- Enforced rigorous engineering best practices for *Cart Kings* and *Kite Fight* gameplay layers.

Game Programmer | Carbonon Tech

Dec 2006 - Mar 2007 (4 mos)

- Programmed layout configuration, level structures, and boundary optimization for a PC racing prototype.

EDUCATION

- **Master of Computer Applications (MCA)** | 78% Score | SSM College of Engineering (Affiliated to Anna University) | Graduated 2006
- **Bachelor of Computer Science** | 67% Score | Sri Vasavi College (Affiliated to Bharathiar University) | Graduated 2003
