

PRAKASH ANGAPPAN

Engineering Manager | Game Development

SUMMARY

Engineering leader with 17+ years of experience shipping 15+ commercial game titles across PC, console, mobile, and web platforms. Proven track record in building engineering teams, defining scalable game architecture, and leading end-to-end development from concept to live operations.

CAREER HIGHLIGHTS

- Mentored and trained 30+ fresh graduates into production-ready game developers.
- Delivered two client game projects generating ~\$32K revenue within 14 months at iXie Gaming.
- Won "Best Performer Award" for technical contributions to Desi Adda (Gameshastra Solutions).
- The Last Bastion - Best Hardcore Game Winner (AnimXpress 2022) and Indie Game of the Year Nominee (IGDC 2022).

WORK EXPERIENCE

Head of Engineering - Gaming Jan 2025 - Present iXie Gaming by Indium

- Managed and mentored teams of up to 10 developers, overseeing gameplay, systems implementation, and Steam integration.
- Led engineering execution and technical design across multiple titles including BharatRun (Demo, Unity 6), Hands of Victory [Steam] (PC Porting, Unity), and Railflow [PlayStore] (Unity).
- Directed development and technical design for Kiosk - Mini Games on the Godot Engine.
- Mentored junior developers through the full lifecycle of casual web games like Math Match [iXieSite] (Unity) and Pumpkin Head's Quest [iXieSite] (Godot).

Lead Programmer Dec 2020 - Dec 2024 VoidPeak Games

- Led a 4-developer team for Radiant Dark [YouTube] (Demo, Action RPG, Unreal 5.3), defining technical architecture and conducting R&D on Gameplay Ability System and Flexible Combat System.

Portfolio

ENGINEERING LEADERSHIP

- Cross-Functional Leadership
- Technical Talent Acquisition
- Engineering Mentorship
- Culture of Ownership
- Team Performance & Morale

PRODUCTION

- Product Ownership
- Release & Delivery Management
- Agile & Scrum Methodologies
- Stakeholder Communication
- Quality & Success Standards

PROGRAMMING LANGUAGES

- C
- C++
- C#

GAME ENGINES

- Unreal Engine 5.3
- Unity
- Phyre Engine (Sony proprietary)
- Vicious Cycle Engine
- BlitzMax
- Torque Game Engine

PLATFORMS

- PC
- PS2, PS3 Move and PSP
- Android and iOS
- Web (HTML/Unity)

GAME DEVELOPMENT EXPERTISE

- Game Architecture
- Gameplay Programming
- AI Systems (Behavior Trees, FSM)
- Performance Optimization

- Managed a team of 2 developers to engineer [The Last Bastion \[Steam\]](#) (Strategy, Unity), taking hands-on ownership of core Enemy AI behaviors and FTUE.

● Lead Game Developer Jan 2019 - Nov 2020 Tentworks Interactive

- Led a 4-developer team for [City Block Builder \[Steam\]](#) (City Building, PC, Unity), defining technical architecture and Implemented complex crowd and worker AI utilizing Playmaker and Behavior Trees.

● Senior Game Developer May 2018 - Oct 2018 Learning Yogi

- Improved application architecture and workflow efficiency for the [AtlasMission bundle \[PlayStore\]](#) (Android/iOS, Unity).

● Lead Game Developer Oct 2014 - Jan 2018 Aavega Interactive

- Defined technical design and developed multiple game modes (Capture the Flag, Team Deathmatch) for [Jolly Rogers Pirates Rumble \[Steam\]](#) (PC, Unity).
- Implemented core systems including Boss AI, UI, and in-game shop systems across mobile titles using Unity, including [Captain Kosmo \[YouTube\]](#), [Spell Easy \[YouTube\]](#), and [Jallikattu run 2 \[YouTube\]](#).

● Game Programmer Apr 2013 - Aug 2014 Dhruva Interactive

- Led a 4-developer prototype team and implemented custom FSM enemy AI for a PC title, alongside UI/collectible systems for mobile games like [Captain Sharky \[YouTube\]](#) (Unity).

● Group Lead Apr 2007 - Sept 2012 Gameshastra Solutions

- Implemented gameplay functionalities for major console titles, earning the "Best Performer Award" for technical contributions to [Desi Adda \[YouTube\]](#) (PS2, Vicious Cycle Engine).
- Developed core gameplay systems, UI, and mini-game integrations for [Kite Fight \[YouTube\]](#) (PS3 Move, Phyre Engine) and [Cart Kings \[YouTube\]](#) (PS2/PSP, Vicious Cycle Engine).

- Implemented collectibles and contributed to level design for EtchASketch [\[YouTube\]](#) (PC, BlitzMax).

- **Game Programmer**
Carbonon Tech

Dec 2006 - Mar 2007

- Designed gameplay levels for a PC Prototype, Auto-rickshaw racing game using the Torque game engine .

TOOLS AND SOFTWARE

- **IDE & Debugging**

Visual Studio, Rider, XCode and ProDg Debugger

- **Version Control**

Perforce, Git, Sourcetree, Git Desktop, Tortoise SVN, and Smart SVN

- **Management**

Jira, Trello, BaseCamp and Excel

EDUCATION

- **Master of Computer Applications(78%)**

SSM College of Engineering (Affiliated to Anna University) | 2006

- **Bachelor of Computer Science(67%)**

Sri Vasavi College[SFW] (Affiliated to Bharathiar University) | 2003
