ENGINEERING LEADERSHIP

- Cross-Functional Leadership
- Technical Talent Acquisition
- Engineering Mentorship
- Culture of Ownership
- Team Performance & Morale

PRODUCTION

- Product Ownership
- Release & Delivery Management
- Agile & Scrum Methodologies
- Stakeholder Communication
- Quality & Success Standards

PROGRAMMING LANGUAGES

- C
- C++
- C#

GAME ENGINES

- Unreal Engine 5.3
- Unity
- Phyre Engine (Sony proprietary)
- Vicious Cycle Engine
- BlitzMax
- Torque Game Engine

PLATFORMS

- PC
- PS2, PS3 Move and PSP
- Android and iOS
- Web (HTML/Unity)

GAME DEVELOPMENT EXPERTISE

- Game Architecture
- Gameplay Programming
- AI Systems (Behavior Trees, FSM)
- Performance Optimization

IDE & DEBUGGING

- Visual Studio, Rider
- Xcode
- ProDG Debugger

- Managed a team of 2 developers to engineer [The Last Bastion \[Steam\]](#) (Strategy, PC, Unity), taking hands-on ownership of core [Enemy AI behaviors](#) and FTUE.

● Lead Game Developer Jan 2019 - Nov 2020 Tentworks Interactive

- Led a 4-developer team for [City Block Builder \[Steam\]](#) (City Building, PC, Unity), defining technical architecture and implemented crowd and worker AI utilizing [Playmaker](#) and [Behavior Trees](#).

● Senior Game Developer May 2018 - Oct 2018 Learning Yogi

- Improved application workflow efficiency and developed two mini-games, 'Catch the Pet' and 'Pet Room,' for the [Atlas Mission bundle \[PlayStore\]](#) (Android/iOS, Unity).

● Lead Game Developer Oct 2014 - Jan 2018 Aavega Interactive

- Contributed to technical design and developed multiple game modes (Capture the Flag, Team Deathmatch) for [Jolly Rogers Pirates Rumble \[Steam\]](#) (PC, Unity).
- Implemented core systems including Boss AI, UI, and in-game shop systems across mobile titles using Unity, including [Captain Kosmo \[YouTube\]](#), [Spell Easy \[YouTube\]](#), and [Jallikattu Run 2 \[YouTube\]](#).

● Game Programmer Apr 2013 - Aug 2014 Dhruva Interactive

- Led a 4-developer prototype team and implemented custom FSM-based enemy AI for a PC title; additionally, developed a side-scrolling platformer and built a generic profile system for [Captain Sharky \[YouTube\]](#) (Unity).

● Group Lead Apr 2007 - Sept 2012 Gameshastra Solutions

- Developed the rhythm-based 'Dandiya' mini-game and integrated all sub-games into the final release, earning the 'Best Performer Award' for [Desi Adda \[YouTube\]](#) (PS2, Vicious Cycle Engine). Created the power-up systems for [Cart Kings \[YouTube\]](#) (PS2/PSP, Vicious Cycle Engine) and implemented the balloon-popping logic for [Kite Fight \[YouTube\]](#) (PS3 Move, Phyre Engine).

VERSION CONTROL

- Git
- Sourcetree
- Git Desktop
- Perforce
- Tortoise SVN
- Smart SVN

PROJECT MANAGEMENT

- Jira
- Trello
- BaseCamp
- Excel

- Implemented collectibles and contributed to level design for [Etch A Sketch \[YouTube\]](#) (PC, BlitzMax).

● Game Programmer Carbonon Tech

Dec 2006 - Mar 2007

- Designed gameplay levels for a PC Prototype, Auto-rickshaw racing game using the Torque game engine .

EDUCATION

● Master of Computer Applications(78%)

SSM College of Engineering (Affiliated to Anna University) | 2006

● Bachelor of Computer Science(67%)

Sri Vasavi College[SFW] (Affiliated to Bharathiar University) | 2003
