

PRAKASH ANGAPPAN

Engineering Manager | Game Development

Bangalore, India | +91-9900370190 | aprakash.mca@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Accomplished Engineering Manager with 17+ years' experience driving technical execution and delivering 15+ commercial games across console, PC, mobile, and web platforms. Expert in managing fast-paced pipelines to deliver player-centric features on schedule without compromising quality or game stability. Implemented generative AI and agentic workflows to speed up the entire game development process, accelerating code production.

CORE COMPETENCIES

- **Engineering Leadership:** Team Building, Mentorship, Performance Evaluations, OKRs, Cross-Functional Collaboration
- **Pipeline & Quality:** Pipeline Management, Design & Code Reviews, Release Management, Engineering Best Practices
- **Technical Domain:** Tech Backlog Modernization, Scalable Game Architecture, Stability & Performance Tuning, Problem-Solving Culture

TECHNICAL SKILLS

- **Programming Languages:** C, C++, C#
- **Engines & Frameworks:** Unity, Unreal Engine 5.3, Godot, Phyre Engine, Vicious Cycle Engine, BlitzMax, Torque
- **Target Platforms:** Console (PS2, PS3 Move, PSP), PC, Mobile (Android/iOS), Web (HTML/Unity)
- **IDEs & Debugging:** Visual Studio, Rider, Xcode, ProDG Debugger (Advanced Analytical & Debugging)
- **Version Control:** Git, Perforce, Sourcetree, Git Desktop, Tortoise SVN, Smart SVN
- **Project Management:** Jira, Trello, BaseCamp, Microsoft Excel (Agile/Scrum Methodologies)

BUSINESS IMPACT

- **Hands of Victory (iXie):** Maintained zero failed deliveries, meeting all milestones for a high-quality demo, securing a 3-month contract extension and additional studio billing.
- **BharatRun (iXie):** Utilized generative AI tools to accelerate development, delivering the core demo 2 months early and securing full commercial game development contracts.
- **Kiosk / Casino Mini Games (iXie):** Managed high-velocity pipelines (2 games/week). Transitioned tech stack to Godot to eliminate licensing costs. Executed a 5-game test phase, resulting in a 100-title contract expansion.

KEY ACHIEVEMENTS

- Created engineering career progression paths, mentoring 30+ graduates into core production pipelines.
- Directed technical delivery for The Last Bastion, winning Best Hardcore Game (AnimXpress 2022) and Indie Game of the Year nominee (IGDC 2022).
- Won Best Performer Award for exceptional game optimization and performance improvements on Desi Adda at Gameshastra.

PROFESSIONAL EXPERIENCE

Head of Engineering - Gaming | iXie Gaming by Indium

Jan 2025 - Present (1 yr, 6 mos)

- Lead 10+ cross-functional developers in a high-energy Agile/Scrum environment.
- Conduct design and code reviews across titles including BharatRun (Mobile Demo), Hands of Victory (PC Porting), and Railflow (Mobile).
- Manage pipelines to ensure timely delivery while maintaining uncompromised code quality and stability.
- Modernized tech stacks by transitioning the Kiosk catalog to Godot Engine, optimizing licensing costs.
- Collaborate with PM, Design, UI/UX, Art, and QA for a player-focused product experience.

Lead Programmer | VoidPeak Games

Dec 2020 - Dec 2024 (4 yrs, 1 mo)

- Led engineering for Radiant Dark (Action RPG, UE5.3); owned pipelines, structured progress, and coded core C++ architecture.
- Fostered a problem-solving culture to clear advanced Gameplay Ability System (GAS) blockers.
- Built foundational Enemy AI architecture and release pipelines for The Last Bastion (Strategy, Unity).

Lead Game Developer | Tentworks Interactive

Jan 2019 - Nov 2020 (1 yr, 11 mos)

- Spearheaded architectural targets for a 4-dev squad on City Block Builder (PC, Unity); delivered high-performance worker AI optimization modules on schedule.

Senior Game Developer | Learning Yogi

May 2018 - Oct 2018 (6 mos)

- Enhanced game stability and app performance for mobile titles Catch the Pet and Pet Room (Unity).

Lead Game Developer | Aavega Interactive

Oct 2014 - Jan 2018 (3 yrs, 4 mos)

- Collaborated across disciplines to build and optimize multiplayer modes for Jolly Rogers Pirates Rumble (PC, Unity).
- Delivered core systems, boss AI logic, and e-commerce UI shop flows across live mobile games.

Game Programmer | Dhruva Interactive

Apr 2013 - Aug 2014 (1 yr, 5 mos)

- Resolved C# architectural defects during prototyping loops for an unannounced PC title.

Group Lead | Gameshastra Solutions

Apr 2007 - Sep 2012 (5 yrs, 6 mos)

- Managed engineers to execute release management, rhythm mechanics, and integrations for Desi Adda (PS2).
- Enforced rigorous engineering best practices for Cart Kings and Kite Fight gameplay layers.

Game Programmer | Carbonon Tech

Dec 2006 - Mar 2007 (4 mos)

- Programmed layout configuration, level structures, and boundary optimization for a PC racing prototype.

EDUCATION

Master of Computer Applications (MCA) | 78% Score | SSM College of Engineering (Affiliated to Anna University) | Graduated 2006

Bachelor of Computer Science | 67% Score | Sri Vasavi College (Affiliated to Bharathiar University) | Graduated 2003
